

Inline Patch Panel Fx110

Product Overview

TTECH UTP Cat 5E Inline Patch Panel Fx110 will maximize your network performance and will keep up with even greatest changes in your network. Fx110 allows you to locate desktop concentrators (or hubs) on a 19" rack mount configuration with easy cable management. It enables instant patching of ethernet cables throughout your network by plugging a cable with RJ45 connector on it to both the front and rear of these patch panels.

Fx110 is a unique new device that can connect patch cords while maintaining Category 5e or 6 performance. The space saving design of this patch panel means that it will fit into the standard 19" cabinet model and take up 1U or 2U depending on the model.
